Value of Dissertations & Theses in Academic Research

Why Use Dissertations and Theses for Research?

Dissertations are scholarly, reviewed work resulting from comprehensive and original research.

Provide in-depth scholarly examples

Provide guide for the research topics

Deliver recommendations and findings, new trends and ideas

Dissertations include up-to-date literature reviews with extensive bibliographies

An extensive review process –by academic peer

Abstract

Translate

The great amounts of data and the large number of artifacts generated during the execution of defense acquisition programs serve as evidence of program progress and decision support. However, acquiring how they can be used to support decision making (DAPS) model is an evidence-based analytical tool evidence produced during a Defense Business System program performance in specific subject matter reviews and milestone reviews (Knowledge Check understanding and ability to innovate and engineer).
